Attorney's Docket No.: 13218-002001 / 11880-003001

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Original) A computer-implemented interface method for use on a display device associated with an exercise device, comprising:
  - connecting a network connection to the exercise device capable of accessing information stored over a network;
  - partitioning a display of the display device associated with the exercise device to form a first display portion to display content;
  - partitioning the display of the display device to form a second display portion to display one or more controls to control the exercise device; and
  - providing a selectable element on the display device that upon selection removes the second display portion from the display.
2. (Original) The method of claim 1, further comprising:
  - expanding the first display portion in response to the selection of the selectable element.
3. (Previously Presented) The method of claim 1, wherein the network connection includes access to the Internet.
4. (Original) The method of claim 1, wherein the first display portion covers a field portion of the display.
5. (Original) The method of claim 1, wherein the second display portion covers a border portion of the display.

Attorney's Docket No.: 13218-002001 / 11880-003001

6. (Original) The method of claim 5, wherein the second display portion occupying the border portion of the display appears to slide like a drawer into the outer edge of the display when removed.

7. (Currently Amended) A method for improving the usability of an interface for an exercise device, comprising:

connecting a network connection to the exercise device capable of accessing information stored over a network;

partitioning a display of ~~the~~ a display device associated with the exercise device to form a first display portion to display content;

partitioning the display of the display device to form a second display portion to display one or more controls to control the exercise device; and

providing a selectable element in the second display portion of the display device that upon selection increases ~~the~~ a size of ~~the~~ one or more selectable elements in the first display portion of the display device.

8. (Original) The method of claim 7, wherein the network connection provides access to the Internet.

9. (Currently Amended) The method of claim 7, wherein the one or more selectable elements in the first portion of the display device capable of increasing in size are hypertext selectable elements.

10-12. Cancelled.

Attorney's Docket No.: 13218-002001 / 11880-003001

13. (Original) An apparatus comprising a computer-readable storage medium tangibly embodying program instructions for use on a display device associated with an exercise device, the program instructions including instructions operable to cause a processor to:

- connect the exercise device to a network having access to information;
- partition a display of the display device associated with the exercise device to form a first display portion to display content;
- partition the display of the display device to form a second display portion to display one or more controls to control the exercise device; and
- provide a selectable element on the display device that upon selection removes the second display portion from the display.

14. (Currently Amended) An apparatus comprising a computer-readable storage medium tangibly embodying program instructions for improving the usability of an interface for an exercise device, the program instructions including instructions operable to cause a processor to:

- connect the exercise device to a network having access to information;
- partition a display of the display device associated with the exercise device to form a first display portion to display content;
- partition the display of the display device to form a second display portion to display one or more controls to control the exercise device; and
- provide a selectable element in the second display portion of the display device that upon selection increases ~~the~~ a size of ~~the~~ one or more selectable elements in the first display portion of the display device.

15. Cancelled.

16. (Previously Presented) The apparatus of claim 13, further comprising program instructions operable to cause a processor to expand the first display portion in response to the selection of the selectable element.

Attorney's Docket No.: 13218-002001 / 11880-003001

17. (Currently Amended) The apparatus of claim 13, wherein the network has  
~~connection includes~~ access to the Internet.

18. (Previously Presented) The apparatus of claim 13, wherein the first display portion  
covers a field portion of the display.

19. (Previously Presented) The apparatus of claim 13, wherein the second display  
portion covers a border portion of the display.

20. (Previously Presented) The apparatus of claim 19, wherein the second display  
portion occupying the border portion of the display appears to slide like a drawer into the outer  
edge of the display when removed.

21. (Currently Amended) The apparatus of claim 14, wherein the network has  
~~connection includes~~ access to the Internet.

22. (Currently Amended) The apparatus of claim 14, wherein the selectable elements in  
the first display portion of the display device capable of increasing in size are hypertext  
selectable elements.
